

### APPENDIX 3

## Index of composers

All composers found in English v.t. sources are listed, with the sources and folio/page numbers where they appear. Where known, the composer's dates are given in square brackets before the sources where he appears.

The following are excluded from the index:

- Foreign composers who do not appear in English sources.
- Foreign Sources for foreign composers who appear in English sources.
- Dubious foreign sources for English composers.
- Composers known only by their initials.

Where ascription is uncertain, the source is preceded by a question mark.

Music that is ascribed to more than one composer is listed under both names and cross-referenced. Where one ascription is more certain than another, the source is listed under the principal composer with the second preceded by a question mark if it is doubtful, or in brackets if it is less likely than the principal ascription.
