## Lagrange Projection

Sing unto the Lord a new song, and his praise from the end of the earth, ye that go down to the sea. — Isaiah 42:10

Where is the end of the earth? The shadow of the earth's far side shows where a hole dug down "to China" would really come out. It's probably at sea, as the Bible verse wisely says.

The Lagrange conformal projection portrays the whole earth on a disc. It occupies the place of honor in the <u>2011</u> card. Empty spaces beyond 80° latitude are artistic license intended to tame the overwhelming visual impact of Antarctica.
