

# Beelines

**The longest beeline.** A superbee flying straight over land can go 1/3 of the way around the world. Over water it can go 2/3 of the way.

*I will go before thee, and make the crooked places straight— Isaiah 45:2*

Bee © Bobbie Peachey

Oblique sinusoidal projection

The [1991](#) card shows a whole-world sinusoidal projection. The oceanic beeline has been eclipsed by a [route](#) that goes 80% of the way around the world from Pakistan to Kamchatka via Cape Horn.
